### **About This Publication**

This publication provides information about the IBM AFP Font Collection Japanese fonts.

#### **Contents of This Publication**

This publication contains the following chapters.

- Chapter 1, "Summary Information" lists the CMap and CIDFont file names, FGIDs, GCSGIDs, and code pages associated with the fonts.
- Chapter 2, "Font Samples" shows you a sample sentence in each font in seven point sizes.
- Chapter 3, "Characters" illustrates all the characters available for printing in the language.
- Chapter 4, "Code Pages" shows the code pages used with the fonts.

#### **Releated Publications**

IBM AFP Fonts: Introduction to Typography, G544-3122, has general information about typography.

IBM AFP Fonts: Type Transformer for Windows User's Guide, G544-5726, has information how to transform the fonts illustrated in this publication from CID-keyed outline format (PostScript fonts) to 240-pel raster format or AFP outline format for printing on advanced function printers.

*IBM AFP Fonts: Font Summary for AFP Font Collection*, S544-5633, has information about the fonts and code pages available from IBM.

These publications have information about Advanced Function Presentation (AFP) and structured fields used with the Advanced Function Presendation data stream:

- IBM Guide to Advanced Function Presentation, G544-3876
- Data Stream and Object Content Architectures: Font Object Content Architecture (FOCA) Reference, S544-3285

For instructions or creating user-defined characters, refer to *FontLab User's Manual*, which is available as a PDF file on the *IBM AFP Font Collection: Type Transformer & Utilities for Windows*, LCD4-1904, is a CD-ROM.

## **Summary of Changes**

This publication is based on the Technical Reference for AFP Font Collection Japanese Fonts, S544-5685-00 as the First Edition. Changes are marked with revision bars. This publication has:

## Second Edition (June, 2000)

- Added information about CMap Name.
- Added information about new SBCS code pages which support the euro currency symbol.
- Added information about new DBCS code page which supports the euro currency symbol and NEC selected characters.

## **Third Edition (October, 2000)**

- Corrected GCGID of the Euro character at x'E1' on Code Page T1H00290.
- Removed extra characer at x'6A' on Code Page T1H01027.

# **Summary of Releases**

This publication reflects the following licensed program releases:

## **Summary Information for Japanese Fonts**

Printers should have a superset table containing the information in Figure 1-3 so that they can recognize subsets of the Japanese font character sets, which are identified by GCSGID. If a job requests a subset of an available font character set, the printer can substitute the superset.

## **Chapter 3. Japanese Characters**

This chapter shows all the characters in the IBM Japanese fonts, including the IBM Japanese Graphic Character Set (revised in March 1999), which includes all characters defined by JIS (Japanese Industrial Standards) X0208-1990, the euro currency symbol, and the NEC selected characters. The characters are printed in the Heisei Mincho font.

The number under each character is the Adobe character identifier (CID). To find the corresponding IBM graphic character global identifier (GCGID), see the Japanese mapping table in the online information on the *IBM AFP Font Collection: Type Transformer & Utilities for Windows*, LCD4-1904 (CD-ROM). The CID is in the first column and the GCGID is in the third column.

The characters of CID number 0 through 8719 is equivalent to Adobe's Japanese Character Collection Adobe-Japan1-2.

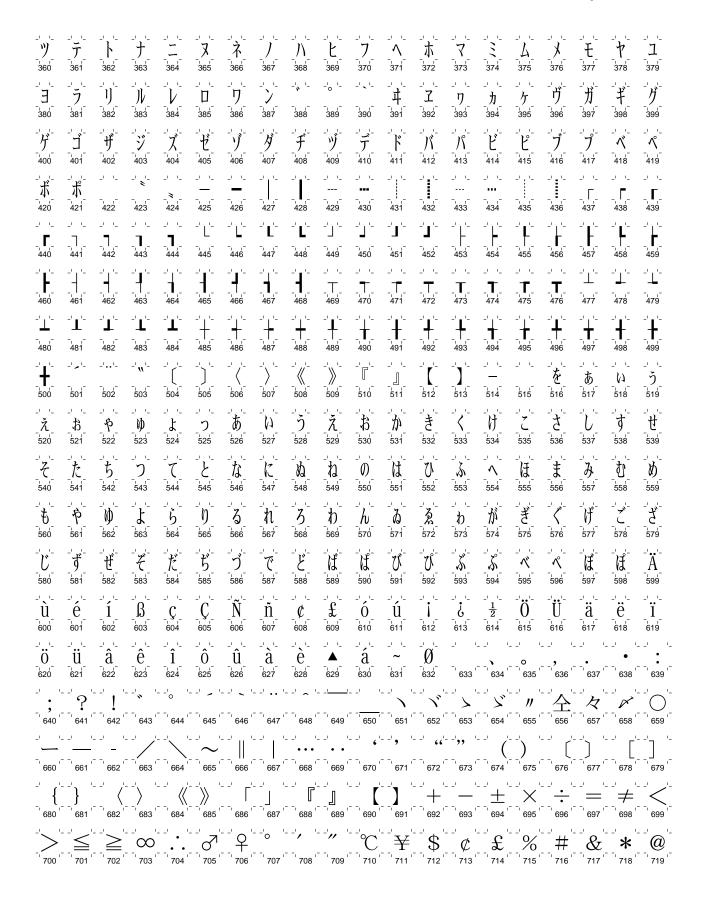

Figure 3-1.CID characteristics

CID number	Contents									
0 through 8283	Adobe-Japan1-0									
	JIS X0208-1983 and JIS X0201-1976 character set standards									
	JIS83 based Apple, NEC, and Fujitsu corporate character set									
8284 through 8358	Adobe-Japan1-1									
	JIS X0208-1990 character set standard									
8359 through 8719	Adobe-Japan1-2									
	Microsoft Windows 3.1J character set contains NEC and IBM extensions									
8720 through 10048	IBM-Japan1-0									
	IBM extensions									

#### Attention:

- In this chapter, you will see a number of CIDs without characters assigned to them. The space for a characters image above CID is blank. This is correct.
- In the Japanese mapping table, you will find that some CIDs with characters assigned to them, as well as the CIDs without characters, have no corresponding GCGID. This is correct.

### **Chapter 4. Japanese Code Pages**

This chapter illustrates the following Japanese code pages:

- T1H00290
- T1HK0290
- T1H01002
- T1H01027
- T1HK0037
- T1H01041
- T1H01030
- T1H01031
- T10300ss
- T10300ss (characters for vertical writing)

Note: ss is the section number. It is blank when T10300 is used with an outline font.

The characters are printed in the Heisei Mincho font. The alphanumeric identifier under each character is the IBM graphic character global identifier (GCGID). To find the corresponding Adobe character identifier (CID), see the Japanese mapping table in the online information on the *IBM AFP Font Collection: Type Transformer & Utilities for Windows*, LCD4-1904 (CD-ROM). The GCGID is in the third column and the CID is in the first column.

Attention: In the Japanese mapping table, you will find that some CIDs have no corresponding GCGID. This is correct.
